ETF name	Vanguard Total Stock Market ETF (NYSE Code: VTI)
ETF class size	\$181,493.97 million
ETF commencement date	24 May 2001
Total fund size	\$1,226,456.10 million

Investment objective

Vanguard US Total Market Shares Index ETF seeks to track the return of the CRSP US Total Market Index, before taking into account fee, expenses and taxes.

ETF overview

The ETF provides exposure to some of the world's largest companies listed in the United States. It offers low-cost access to a broadly diversified range of securities that allows investors to participate in their long-term growth potential. The ETF is exposed to the fluctuating values of the US currency, as there will not be any hedging to the Australian dollar.

Performance return^{A,B,C,D,E} (%)

	ETF gross	Bmk	ETF total	Distb'n	Growth
1 month	0.24	0.24	0.24	0.00	0.24
3 months	9.37	9.36	9.36	0.40	8.96

Quarter ended	Amount (CPU) in USD	Reinvestment price
30 September 2019	70.0000	N/A

Notes

- ^A Past performance is not an indication of future performance.
- ^B Returns assume reinvestment of all distributions. Returns for periods longer than 1 year are annualised. ETF gross returns are before management costs and taxes, but after transaction and operational costs. ETF total return is the ETF gross return less management costs. Index returns do not allow for taxes, management, transaction and operational costs.
- ^C Returns assume that an investor purchased units at Net Asset Value (NAV) and does not reflect the transaction costs imposed on the creation and redemptions of ETF units, brokerage or the bid ask spread that investors pay to buy and sell ETF securities on the Australian Securities Exchange.
- ^D Prior to 3 June 2013, the ETF's benchmark was the MSCI US Broad Market Index.
- ^E Past distributions are not an indication of future distributions.

Vanguard US Total Market Shares Index ETF

In preparing the above information, individual circumstances, for example tax implications, have not been taken into account and it may therefore not be applicable to an individual's situation. Before making an investment decision, you should consider your or your clients' circumstances and whether the above information is applicable to you or your clients' situation. Vanguard is the issuer of the Prospectus on behalf of the US listed exchange traded funds ("ETFs") described in the Prospectus. Vanguard has arranged for interests in the US ETFs to be made available to Australian investors via CHESS Depository Interests that are quoted on the AQUA market of the Australian Securities Exchange ("ASX"). Vanguard ETFs will only be issued to Authorised Participants, that is persons who have been authorised as trading participants under the ASX Operating Rules ("Eligible Investors"). Retail investors can transact in Vanguard ETFs through a stockbroker or financial adviser on the secondary market. Investors should consider the Product Disclosure Statement in deciding whether to acquire Vanguard ETFs. Retail investors can only use the Product Disclosure Statement for informational purposes only. You can access the Product Disclosure Statement on our website. Unless otherwise stated, all currencies shown in this document are in Australian dollars.

Glossary

Median market cap is the midpoint of market capitalisation (market price multiplied by the number of shares outstanding) of the shares in the fund. Half the shares in the fund will have higher market capitalisation, half will have lower.

Price/Earnings ratio (P/E ratio) is a measure of the market value of a share compared to the earnings of the company. A share with a price of \$10, and earnings last year of \$1 a share, would have a P/E ratio of 10. For a fund, the ratio is the weighted average P/E ratio of the shares it holds. In general, a high P/E suggests that investors are expecting higher earnings growth in the future compared to companies with a lower P/E. Companies with negative earnings are excluded from the calculation.

Price/Book ratio is calculated by dividing the current market price of the share by the book value per share of the company.

Return on equity ratio is a measure of how much profit a company generates relative to its shareholders' equity. For a fund, the ratio is the weighted average return on equity ratio of the shares it holds.

Earnings growth rate is a measure of the trailing Earnings Per Share growth for a given company and share. For a fund, the rate is the weighted average earnings growth of the shares it holds.

Equity yield (dividend) is the dividend income earned by shares, expressed as a percentage of the market price of those shares. For a fund, the yield is the weighted average equity yield of the shares it holds.
