Investment objective

The Vanguard International Shares Select Exclusions Index Fund - AUD Hedged seeks to track the return of the MSCI World ex-Australia, ex-Tobacco, ex-Controversial Weapons, ex-Nuclear Weapons (with net dividends reinvested) hedged into AUD Index before taking into account fees, expenses and tax.

Fund overview

The Fund provides exposure to many of the world's largest companies listed in major developed countries. It offers low-cost access to a broadly diversified range of securities that excludes companies involved in the production of tobacco, controversial weapons and companies that manufacture nuclear weapons, components that were developed or significantly modified for exclusive use in nuclear weapons, and companies that provide auxiliary services related to nuclear weapons. The Fund is hedged to Australian dollars so the value of the Fund is relatively unaffected by currency fluctuations.

Glossary

Median market cap is the midpoint of market capitalisation (market price multiplied by the number of shares outstanding) of the shares in the fund. Half the shares in the fund will have higher market capitalisation, half will have lower.

Price/Earnings ratio (P/E ratio) is a measure of the market value of a share compared to the earnings of the company. A share with a price of \$10, and earnings last year of \$1 a share, would have a P/E ratio of 10. For a fund, the ratio is the weighted average P/E ratio of the shares it holds. In general, a high P/E suggests that investors are expecting higher earnings growth in the future compared to companies with a lower P/E. Companies with negative earnings are excluded from the calculation.

Price/Book ratio is calculated by dividing the current market price of the share by the book value per share of the company.

Return on equity ratio is a measure of how much profit a company generates relative to its shareholders' equity. For a fund, the ratio is the weighted average return on equity ratio of the shares it holds.

Earnings growth rate is a measure of the trailing Earnings Per Share growth for a given company and share. For a fund, the rate is the weighted average earnings growth of the shares it holds.

Equity yield (dividend) is the dividend income earned by shares, expressed as a percentage of the market price of those shares. For a fund, the yield is the weighted average equity yield of the shares it holds.
